MAIN REASONS TO CHOOSE THE C-SERIES

HIGH PRECISION AND CONTROLLABILITY

High performance and smooth control.

The CASE Intelligent Hydraulics System is the result of continuous research of perfection of a legendary brand. CASE is synonymous and reference in the market for its fastest cycles times, best energy saving performance and smooth control.

HIGH EFFICIENCY

Up to 4% more fuel efficiency due to hydraulic system control and 6% better efficiency from FPT engine.

5 energy saving controls & ECO gauge function enable the continuous monitoring of the fuel consumption.

HIGH RELIABILITY

Robust design.

Increased plate thickness on HD structures and HD attachments to improve durability.

Lower cost of ownership.

With the CASE World Class Manufacturing.

COMFORT AND SAFETY

Spacious and safe cab.

Low noise and vibrations.

Ergonomic workstation.

Real time parameters monitoring.

With the newly designed cab, fully adjustable seat, joysticks and 7" LCD monitor.

OUTSTANDING VISIBILITY

Safe and fast operations.
More comfort.
With wider glazed area.

FAST CYCLES

Higher breakout force.
Continuous operations.
Up to 10% higher digging capability.
**With A/H/SP working modes and
Auto Power boost.**

HIGH VERSATILITY

The perfect machine
for every application.
**With 3 available power
modes and 10 auxiliary
hydraulic settings.**

LOW TOTAL COST OF OWNERSHIP

Longer service intervals.
Reduced downtimes.
Fast, easy and safe maintenance operations.
**High quality components and
service points accessible from the ground.**

HIGH PRECISION AND CONTROLLABILITY

The proven CASE Intelligent Hydraulic System (CIHS) delivers impressive machine control with unrivalled energy and fuel savings in all cycle time phases. Two variable displacement axial piston pumps with regulating system are combined with the CASE main valve, designed in Japan for fine, precise and efficient operations.

The Hydraulic system is governed by a Machine Control Unit which collects input from pressure sensors located on pumps, main valve and pilot lines. The Machine Control Unit contentiously dialogue with the Engine Control Unit in order to optimize machine output at any moment in any condition.

HIGH EFFICIENCY

CASE advanced energy management consists of **5 Energy Saving Controls**

- **Automatic Economy control (AEC):** improving fuel efficiency by drop in engine rpm when the joystick is in neutral position.
- **Boom Economy Control (BEC):** increased fuel efficiency in boom lowering/swinging operations.
- **Swing Relief Control (SWC):** optimized hydraulic power distribution in slewing operations to deliver the most efficient flow and pressure.
- **Spool Stroke Control (SSC):** pressure and flow control during digging and leveling operations
- **Idle functions**
 - **Auto Idle:** lowers engine rpm after 5 seconds of joystick inactivity;
 - **Idle Shutdown:** shuts the engine down after a pre-set time.
 - **Regenerative:** hydraulic circuit for boom, arm & bucket operations for better productivity.

The CX220C model is powered by **fuel efficient FPT (Fiat PowerTrain) Engine**, designed to boost machine performances and optimize fuel economy.

The 6 cylinders FPT engine **delivers** outstanding power and torque, that reduces the transient time making the hydraulic system immediately reactive to any load.

Fuel consumption can be constantly monitored by the operator throughout the **new ECO gauge** function, that displays in real time the energy saving level utilized.

QUALITY YOU CAN TRUST

HIGH RELIABILITY

Accurate, robust and simple design for high durability.

- The CX220C delivers leading design solutions.
- Boom & Arm plate thickness increased by 33% and upper-structure has been reinforced in all area with higher stress to increase the durability.
- The boom has high strength casting parts joined with thicker hinge flanges to reduce stress on the structures.
- The arm design features a single side lateral thicker plate, with extra reinforcement plates and grid on bottom side.
- The bucket linkage has a fortified structure and reduced tolerances for increased component life minimizing downtime.
- The anti-friction resin shims in the boom foot and head reduce noise and free play, increasing durability and reliability for the customer.

New Undercarriage Structure Designed to last!

Thicker structural plates and new design:

- The 'sloped' lower frame design reduces the time needed to clean the undercarriage.
- Reinforced idler guards to protect from stones.
- Larger pin diameter to reduce contact surface pressure and increase component life.
- Travel motor case frame with thicker plate for better durability.
- Recoil spring increase stroke for better cushion performance.
- Track guards to keep chain on rollers in any condition.

COMFORT AND SAFETY

- Superior wide & roomy cab with ample legroom, More secure & safe working environment.
- Ergonomically designed seat with 8 different adjustments enhances operator comfort and hence productivity.
- Vibration dampening protects against whole body fatigue for all day productivity.
- Openable roof window to give better visibility on top.
- Fully adjustable right hand console includes advanced engine throttle control, that determines working mode selection. The console is equipped with a luminosity switches to ensure that the graphics are clear and easily readable in bright sunlight.
- New cab has thinner pillars and wide glass areas, including one piece window on right hand side, for improved visibility all round. Longer seat slides, a fully reclining seat and foot space, and air conditioning with 8 outlet vents ensure that any operator can stay comfortable throughout the working day. A clock is included. Storage is provided, with a large box behind the driver's seat and bottle or can holders on front right side.
- Radio's slot, speakers and antenna as standard for an easy radio add on.
- Telematic's predisposition for an easy plug in.

OUTSTANDING VISIBILITY

- Wider glazed surface with two pieces door's window.
- Improved front, top and side visibility - Openable roof window to give better visibility on top.
- New 7" LED cluster to constantly monitor the main machine parameters.

QUALITY YOU CAN TRUST

FAST CYCLES

The advanced hydraulic system offers higher breakout forces, improved swing speeds and greater swing torque, resulting in **faster cycle times and 5% increase in productivity.**

Power boost function is automatically engaged. The electronic management of speed and power lowers fuel consumption and offers considerable productivity benefits in terms of outputs.

HIGH VERSATILITY

3 power modes to match any customer need:

- A** AUTO: for normal digging, grading, lifting and precision work. Power Boost always engaged.
- H** HEAVY: for heavy operations always granting the best balance between productivity and fuel economy. Power Boost automatically engaged.
- SP** SUPER POWER: extra speed and power for the most demanding jobs that require maximum productivity. Power Boost automatically engaged.

Operators can store up to **10 auxiliary hydraulic flow and pressure settings** to easily switch among different attachments with no need of any mechanical adjustment.

LOW TOTAL COST OF OWNERSHIP

- All filters and regular check points are grouped and easily accessible from the ground.
- Easy access and centralised lubrication points.
- Battery disconnect switch accessible from ground while servicing the machine.
- Radiator and cooler are mounted side by side for more efficient cooling and easy access for cleaning.
- Machine can be supplied suitable for Tropical climate (from -15°C to +50°C) or Super Tropical climate (from -15°C to +55°C)
- Optional refueling pump with auto cut off reduces downtime for regular fills.

BUILDING A STRONG CASE.

Since 1842, at CASE Construction Equipment we have lived by an unwavering commitment to build practical, intuitive solutions that deliver both efficiency and productivity.

We continually strive to make it easier for our customers to implement emerging technologies and new compliance mandates.

Today, our global scale combined with our local expertise enables us to keep customers' real-world challenges at the center of our product development.

The vast CASE dealers' network is always ready to support and protect your investment and exceed your expectations, while also providing you with the ultimate ownership experience.

Our goal is to build both stronger machines—and stronger communities. At the end of the day, we do what's right for our customers and our communities so that they can count on CASE.
